

Rhyolite Ridge Pre-Feasibility Study Announcement - Webcast Details

Thursday, 18 October 2018 – Australian-based lithium-boron mine developer **Global Geoscience Limited** (“Global” or the “Company”) (ASX: GSC) will release the outcomes of the Rhyolite Ridge Pre-Feasibility Study on 23 October 2018.

Managing Director Mr Bernard Rowe will conduct a briefing followed by a question and answer session at **11.00am AEDT (Sydney time) on 23 October 2018**.

A live webcast of this briefing with synchronized slides and a video on the Rhyolite Ridge Lithium-Boron Project will be available via [this link](#). Written questions may be submitted via the webcast.

If you prefer to listen via a phone and/or ask questions verbally, please dial-in as follows:

Australia: 1 800 908 299

International: +61 2 9007 8048

Conference ID: 334505

The presentation will be available for download from www.globalgeo.com.au prior to the call commencing.

A recording of webcast will subsequently be made available on the Company’s website.

About Global Geoscience

Global Geoscience Limited (ASX:GSC) is an Australian-based lithium-boron mine developer focused on its 100%-owned Rhyolite Ridge Lithium-Boron Project in Nevada, USA.

Rhyolite Ridge is a large, shallow lithium-boron deposit located close to existing infrastructure. It is a unique sedimentary deposit that has many advantages over the brine and pegmatite deposits that currently provide the world’s lithium. Rhyolite Ridge is one of only two known large lithium-boron deposits globally.

Global Geoscience is aiming to capitalise on the growing global demand for lithium and boron. Lithium has a wide variety of applications that include glass, ceramics, lubricants and its main growth market, batteries. Boron is used in glass, fiberglass, insulation, ceramics, semiconductors, agriculture and many other applications. Global Geoscience aims to develop the Rhyolite Ridge Lithium-Boron Project into a strategic, long-life, low-cost supplier of lithium and boron products.
