ioneer Completes Asian Boric Acid Distribution and Sales Network

21 May 2020

ioneer announced that it has secured two separate boric acid Distribution and Sales Agreements (Agreements) for the supply of boric acid from its Rhyolite Ridge Lithium-Boron Project in Nevada, USA, substantially completing its Asian boric acid distribution and sales network. Three-year boric acid Distribution and Sales Agreements signed with Kintamani Resources and Boron Bazar covering critical additional territories in Asia. The signing of these Agreements completes the key components of its current Asian boric acid marketing plan to secure direct offtake or distribution and sales agreements with recognised industry participants for most major Asian countries. Distribution and Sales Agreements expected to commence Q2 2023 as Rhyolite Ridge production commences.
